

Title: "What did our secondary school and pre-university students say about their physical education (PE) lessons?" – Students' perceptions of PE among Singapore schools.

What do our secondary or pre-university students like or dislike about their PE lessons? For many students in primary school, Physical Education (PE) is their favourite subject. What about secondary and pre-u students? Is it because there is no examination? They do not like to perspire? Their teachers are knowledgeable and engaging?

Focused group discussions (FGDs) were conducted with a total of 290 students from 9 Secondary schools and 4 Pre-Universities. These students shared what they have learned in PE, what they liked, disliked, and wished for their PE lessons to be. Come and hear from our students' voice to see if that is what we teachers think too? This presentation also explores some recommendations for secondary school and pre-u PE practitioners to consider in order to engage their students more effectively during lessons.
